Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

Application No.

09/668,089

Applicant(s)

HABUTO ET AL.

Examiner

Eron J Sorrell

Art Unit

2182

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 13 November 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-83 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-83 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 22 September 2000 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. §§ 119 and 120

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some \* c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 13) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application) since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.
- a) ☐ The translation of the foreign language provisional application has been received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121 since a specific reference was included in the first sentence of the specification or in an Application Data Sheet. 37 CFR 1.78.

### Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 8, 9, 17-20, 22-28, 31, 32, 40-43, 45-51, 54, 55, 63-66, and 68-72 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuba et al. (U.S. Patent No. 5,806,072 hereinafter referred to as Kuba).

3. Referring to apparatus claim 1, method claim 24, system claim 47 and program claim 70, Kuba discloses a data reading-and-writing apparatus, system, and method for reading and writing data in at least one conforming format to a recording medium capable of recording data in a plurality of formats, the reading and writing apparatus and system comprising:

reading-and-writing means for performing reading and writing to the recording medium (see item labeled 10 in figure 2);

Art Unit: 2182

control means for controlling the data reading-and-writing apparatus so as to record the data in the conforming format in a predetermined directory of the recording medium (see lines 53-67 of column 14 and lines 1-7 of column 15), to read the data in the conforming format from the predetermined directory of the recording medium (see lines 18-23 of column 15), and to recognize and handle data in a non-conforming format, which differs from the conforming format, by referring to a directory other than the predetermined directory of the recording medium to determine the format of the newly received data (see lines 19-50 of column 28), wherein the data in a non-conforming format is data that is incapable of being processed by the reading-and-writing apparatus (see item labeled 167 reading "impossible to reproduce and line 54 of column 26 to line 45 of column 27); and storing means for storing the data in non-conforming format (see lines 33-37 of column 5 and lines 12-17 of column 8).

4. Referring to apparatus claim 2, method claim 25, system claim 48, and program claim 71, Kuba discloses the reading-and-writing apparatus informs a user of a state of the data reading-and-writing apparatus based on the information concerning the data in the non-conforming format (see lines 19-50 of column 28).

Art Unit: 2182

5. Referring to apparatus claim 3, method claim 26, system claim system claim 49, and program claim 72, Kuba discloses the reading-and-writing comprises a display means for performing predetermined display, under the control of the control means, based on information concerning the data in the non-conforming format (see lines 12-18 of column 28).

6. Referring to apparatus claim 4, method claim 27, and system claim 50, Kuba discloses a light-emitting means for emitting light, wherein the control means varies a light emitting state of the light-emitting means based on the information concerning the data in a non-conforming format (see lines 5-20 of column 27).

7. Referring to apparatus claim 5, method claim 28, and system claim 51, Kuba discloses using an audio alert means for generating an audio alert based on the information concerning the data in the non-conforming format (see lines 51-60 of column 49).

8. Referring to apparatus claim 8, method claim 31, and system claim 54, and program claim 75, Kuba discloses the reading-and-

Art Unit: 2182

writing apparatus further comprises operating means for giving instructions (see figure 3), wherein the control means causes the display means to perform predetermined display in accordance with the instructions given by the operating means (see items labeled 12c, and 12d in figure 8).

9. Referring to claim apparatus claim 9, method claim 32, and system claim 55, and program claim 76, Kuba discloses the control means in the reading-and-writing apparatus causes the display means to display in response to the instruction given by the operating means to determine the content of the recording medium (see lines 60-67 of column 18 and lines 1-13 of column 19), and in response to the instruction given by the operating means to read the recording medium (see figure 43).

10. Referring to claim apparatus claim 17, method claim 40, system claim 63, and program claim 81, Kuba discloses the data in the plurality of formats are stored in directories having corresponding predetermined names (see lines 22-45 of column 5); and

the control means refers to the directories based on the names of the directories (see lines 44-56 of column 1).

Art Unit: 2182

11. Referring to claims apparatus claims 18 and 19, method claims 41 and 42, and system claims 64 and 65, Kuba discloses the directories are created in the root directory, or in any other existing directory (see lines 53-67 of column 14 and lines 1-7 of column 15).

12. Referring to apparatus claim 20, method claim 43, system claim 66, and program claim 82, Kuba discloses the reading-and-writing apparatus comprises storage means for storing corresponding relationship information indicating the corresponding relationships between the names of the directories and the content of the data stored in the directories;

wherein the control means compares, based on the corresponding relationship information in the storage means, the names of the directories recorded on the recording medium with the names of the directories indicated in the corresponding relationship information (see lines 32-45 of column 34).

13. Referring to apparatus claim 22, method claim 45, and system claim 68, Kuba discloses the conforming format includes one type (see lines 30-51 of column 25).

Art Unit: 2182

14. Referring to apparatus claim 23, method claim 46, and system claim 69, Kuba discloses the recording medium includes a non-volatile memory (see lines 11-30 of column 14).

***Claim Rejections - 35 USC § 103***

15. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

16. Claims 6, 7, 29, 30, 52, 53, 73, and 74 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuba.

17. Referring to claims apparatus claims 6 and 7, method claims 29 and 30, system claims 52 and 53, and program claims 73, and 74, Kuba fails to explicitly set for the limitation that the control means controls the display to display the number of non-conforming items and the size of the non-conforming items on the display.

Kuba does however disclose using a hierarchical directory structure similar to MS-DOS (see lines 23-28 of column 2).

It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to modify the apparatus of Kuba such that the control means controls the display to display the number of non-conforming items and the size of the non-conforming items on the display. MS-DOS is capable of displaying the number predetermined files and the size of those files and Kuba suggests using a hierarchical directory structure such as MS-DOS.

18. Claims 21,44,67, and 83 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuba in view of Ando et al. (U.S. Patent No. 6,341,196 hereinafter referred to as Ando).

19. Referring to apparatus claim 21, method claim 44, system claim 67, and program claim 83, Kuba fails to disclose the directories storing data indicating the content of the data stored in the directory and the control means recognizing the content of the data stored in the directories based on the data indicating the content of the data.

Ando discloses a reading-and-writing apparatus wherein the directories store data indicating the content of the data stored

Art Unit: 2182

in the directory and the control means recognizing the content of the data stored in the directories based on the data indicating the content of the data (see lines 1-15 of column 18).

It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to modify the apparatus of Kuba with that of Ando such that the directories store data indicating the content of the data stored in the directory and the control means recognizing the content of the data stored in the directories based on the data indicating the content of the data. This would allow the contents of the directory to be inspected by just reading that data.

20. Claims 11-15, 34-38, 57-61, 78, and 79 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuba in view of Walters et al. (U.S. Patent No. 6,453,281).

21. Referring to apparatus claims 11-15, method claims 34-38, system claims 57-61, and program claims 78 and 79, Kuba discloses identifying non-conforming data (see lines 37-50 of column 8), however Kuba fails to explicitly set forth the limitations that the non-conforming data is erased and how it is erased.

Art Unit: 2182

Walters discloses a reading-and-writing apparatus wherein some or all of the data files can be erased from the system either in file units or category units and information concerning the files to be deleted are shown on the display (see lines 8-39 of column 21).

It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to modify the apparatus of Kuba such that some or all of the data files can be erased from the system either in file units or category units and information concerning the files to be deleted are shown on the display. This would allow for capacity of the memory card used in another system to be completely used by the instant device.

22. Claims 16,39 and 62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuba in view of Takayanagi (U.S. Patent No. 5,251,297).

23. Referring to apparatus claim 16, method claim 39, system claim 62, and program claim 80, Kuba discloses identifying non-conforming data (see lines 37-50 of column 8), however Kuba fails to explicitly set forth the limitation that the non-

conforming data is erased when the residual capacity of the recording medium for writing conforming data is insufficient.

Takayanagi discloses a reading-and-writing apparatus wherein data can be erased from memory when the residual capacity becomes insufficient (see abstract).

It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to modify the apparatus of Kuba with that of Takayanagi such that data can be erased from memory when the residual capacity becomes insufficient. This would allow for capacity of the memory card used in another system to be completely used by the instant device.

#### ***Response to Arguments***

24. Applicant's arguments filed 11/13/03 have been fully considered but they are not persuasive. The applicant argues:

1) Kuba fails to teach the newly added limitation of the data in non-conforming format is data that is incapable of being processed by the reading-and-writing apparatus (see paragraph bridging pages 21 and 22 of applicant's remarks filed 11/13/03);  
and

2) Kuba does not teach storing data in non-conforming format (see paragraph bridging pages 21 and 22 of applicant's remarks filed 11/13/03).

25. **As per arguments 1 and 2**, the Examiner disagrees. Kuba does teach storing non-conforming format data (see lines 5-33 of column 27 and figure 39). Specifically, Kuba teaches checking the attributes of the file in question (see elements S155, S156, and S157 of figure 39). If there is a negative determination for all of those steps the method then proceeds to steps S158 and S159 (see figure 39). Subsequently the method checks if the header identifier is of a known type (i.e. conforming data; see step S160 of figure 39). If a negative determination is made, the method generates an alarm of impossible to reproduce data (see element S167). This stored data with the unknown header is the non-conforming data and it is clear that this data is incapable of being processed since it produces and impossible to reproduce error.

### **Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eron J

Art Unit: 2182

Sorrell whose telephone number is 703 305-7800. The examiner can normally be reached on Monday-Friday 9:00AM - 5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffery A Gaffin can be reached on 703 308-3301. The fax phone numbers for the organization where this application or proceeding is assigned are 703 746-7239 for regular communications and 703 746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703 305-3900.
